

- Education:** **Baruch College, City University of New York**, New York, N.Y. July 2014
Bachelor of Business Administration in Computers and Information Sciences
Minor in Mathematics
- Technology Summary:** **Operating Systems:** Mac OS X / Linux (Ubuntu Server and Debian)
Front-end: HTML5 / CSS3 / JavaScript / jQuery / Bootstrap / AngularJS / Polymer
Back-end: PHP / MySQL / Node JS / Go
Workflow: Git / SVN / JIRA
CMS: WordPress / WooCommerce
Scripting Languages: Lua / Python
Programming Languages: Swift / Objective-C
- Professional Experience:** **Software Engineer** October 2016 – Present
UI Engineer November 2015 – October 2016
Ubersmith, New York, N.Y.
- Started as a front-end position to help modernize Ubersmith, a PHP based, billing software, with built-in infrastructure, order, and support ticket manager.
 - Was promoted to full stack developer in the first year to help separate the front-end and back-end codebases, and modernize the interaction between them.
 - Modernized code by removing legacy “hacks” such as html tables and iframes in favor of standards like ajax and the latest css3.
- Website Engineer** March 2015 – November 2015
TransPerfect, New York, N.Y.
- Configured profiles for spidering and crawling of website content to be translated
 - Adjusted HTML, JavaScript and CSS as necessary for localization
 - Performed analysis of web sites and applications for localization potential
 - Developed scripts to automate file parsing and filtering, and other related activities
- PHP / MySQL Product Software Developer** October 2014 – January 2015
ActiveFreedom, Brooklyn, NY
- Developed Magento import scripts based upon detailed specifications and requirements
 - Integrated Amazon MWS API feed submissions for new Magento products
 - Implemented front-end layout for database record lookup and excel-like editing
- Technical Intern,** February 2011 – August 2014
SCE Consultants, Inc., Fort Lee, NJ
- Provided technical support for various clients
 - Performed diagnostics and troubleshooting of system issues, documented help desk tickets/resolutions, and maintained equipment inventory lists
 - Configured Domain Controllers, Active Directory, and Microsoft SQL
- Portfolio:** **Websites & CMS Platforms**
